

AI-Empowered SAFe® Leading SAFe

Lead lean-agile transformation and accelerate value with AI.

As organizations race to stay competitive, leaders must master both the “operating system” of business agility and the transformative potential of AI. This course provides the foundational knowledge to lead a Lean-Agile enterprise while integrating AI as a powerful work accelerant. You will learn to align complex organizations around clear goals, drive customer-centricity, and use specific AI prompting techniques to streamline your leadership responsibilities. By mastering the intersection of SAFe and AI, you will empower your teams to deliver higher-quality solutions at unprecedented speeds.

What You’ll Learn

Lean Agile Transformation

Apply a SAFe mindset, values, and principles to lead your enterprise effectively.

Establish Technical Agility

Organize cross-functional teams around value rather than traditional business hierarchies.

Align Strategic Objectives

Unify the entire organization around clear goals to improve value flow.

Apply Practical, Responsible AI Prompting Techniques

Integrate responsible AI tools to streamline workflows and solve complex problems faster.

Topics Covered

- Adapting and thriving with SAFe
- Building a Foundation with Mindset, Values and Principles
- Team and Technical Agility
- Agile Product Delivery
- Lean Portfolio Management
- Leading the Change

Benefits of Earning Your SA Certification

Earning your SAFe Agilist certification and keeping it active also provides access to SAFe+ benefits like SAFe Skills and selected workshops, in addition to SAFe knowledge articles, community forums, exclusive content, and more.
